

IN THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application.

We claim:

1-9. (canceled)

10. (currently amended) A cosmetic self-warming product for skin cleansing, comprising a composition which is substantially water-free and contains:

0.1 to 40 % by weight of a hydrophilic aluminum-rich zeolite with a pore size in the range of 0.3 to 0.5 nm,

1 to 99 % by weight of a disperse oil phase, selected from the group consisting of triglycerides, silicone oils and mixtures thereof,

0.1 to 50 % by weight of a non-ionic surface-active agent,

0.1 to 40 % by weight of an emollient,

0.1 to 20 % by weight of a thickener, selected from the group consisting of polyethylene, 12-hydroxy stearic acid, ~~elav~~, cosmetically useful castor oil derivatives and waxes, and

ad 100 % by weight cosmetic carrier substances, auxiliary substances, active substances and mixtures thereof,

with the proviso that no polyvalent alcohols and polar solvents are contained in the product.

11. (canceled)

12. (previously presented) The product according to Claim 10 wherein the product contains a zeolite with a ratio Si/Al in the range of 2-5:1.

13. (previously presented) The product according to Claim 10 wherein the zeolite content is in the range of 15 to 25 % by weight.

14. (previously presented) The product according to Claim 10 wherein the dispersed oil content is in the range of 20 to 70 +% by weight.

15. (previously presented) The product according to Claim 10 wherein the dispersed oil is anhydrous Caprylic/Capric Triglyceride.

16. (previously presented) The product according to Claim 10 wherein the thickener is 0.2 to 10 % by weight wax or castor oil derivative or a mixture thereof.

17. (currently amended) A method for cleaning skin, comprising applying to skin a composition comprising:

0.1 to 40 % by weight of a hydrophilic aluminum-rich zeolite with a pore size in the range of 0.3 to 0.5 nm,

1 to 99 % by weight of a disperse oil phase selected from the group consisting of triglycerides, silicone oils and mixtures thereof,

0.1 to 50 % by weight of a non-ionic surface-active agent,

0.1 to 40 % by weight of an emollient,

0.1 to 20 % by weight of a thickener selected from the group consisting of polyethylene, 12-hydroxy stearic acid, ~~elav~~, cosmetically useful castor oil derivatives and waxes, and

ad 100 % by weight cosmetic carrier substances, auxiliary substances, active substances and mixtures thereof,

with the proviso that no polyvalent alcohols and polar solvents are contained in the composition; and [[,]]

combining said composition ~~in combination~~ with 10 to 100 % by weight of water relative to the weight of the composition ~~product~~ for thorough cleansing of the skin; wherein said composition is exothermic on contact with water and is formulated to cause a raise in temperature of the skin by 4 to 8 K during cleansing compared to the starting surface temperature of the skin.

18. (previously presented) The method according to Claim 17, wherein for cleansing said composition is mixed with a further 40 to 60 % by weight water based on the weight of the starting composition.

19. (previously presented) The method according to claim 17, wherein said composition is in the form of a hand cream, face mask, foot scrub or lotion.
